Union Pacific Reports First Quarter 2023 Results

- *Earnings per diluted share of \$2.67*
- *Operating revenue up 3%*
- *Reportable Derailment Rate Improved 10%*

Omaha, Neb., April 20, 2023 – Union Pacific Corporation (NYSE: UNP) today reported 2023 first quarter net income of \$1.6 billion, or \$2.67 per diluted share. These results include \$107 million in other income from a one-time real estate transaction. This compares to 2022 first quarter net income of \$1.6 billion, or \$2.57 per diluted share.

"We delivered greater network fluidity and resiliency in the first quarter even as we faced a series of significant weather events," said Lance Fritz, Union Pacific chairman, president, and chief executive officer. "In addition to the impact of weather on carload volumes and costs, higher inflation also reduced our operating income and more than offset our record first quarter operating revenue. Despite a continued challenging environment, our strengthening service product, bolstered by a strong pipeline of new employees, gives us confidence we can capture available demand and improve efficiency the remainder of the year."

Financial Results: Topline Growth Driven by Fuel Surcharge Revenue and Core Pricing Gains; Service Recovery, Inflation, and Weather Impact Cost Structure; First Quarter Records for Operating Revenue, Net Income, and Earnings Per Share

First Quarter 2023 Compared to First Quarter 2022

- Operating revenue of \$6.1 billion was up 3% driven by higher fuel surcharge revenue and core pricing gains, partially offset by a negative business mix and volume declines.
- Business volumes, as measured by total revenue carloads, were down 1%.
- Union Pacific's 62.1% operating ratio deteriorated 270 basis points. Falling fuel prices in the quarter positively impacted the operating ratio by 190 basis points.
- Operating income of \$2.3 billion declined 3%.
- The company repurchased 2.9 million shares in first quarter 2023 at an aggregate cost of \$0.6 billion.

Operating Performance: Service and Efficiency Measures Impacted by Weather Events

First Quarter 2023 Compared to First Quarter 2022

- Quarterly freight car velocity was 196 daily miles per car, a 1% decline.
- Quarterly locomotive productivity was 123 gross ton-miles (GTM)s per horsepower day, a 5% decline.
- Average maximum train length of 9,159 feet was flat.
- Quarterly workforce productivity decreased 6% to 991 car miles per employee.

-more-

- Fuel consumption rate of 1.123, measured in gallons of fuel per thousand GTMs, deteriorated 1%.
- Union Pacific's reportable derailment rate improved 10% to 2.21 per million train miles compared to 2.46 for 2022.

Maintaining 2023 Full Year Guidance

- Carloads to exceed Industrial Production
 - Current Industrial Production forecast: -0.7%
- Operating ratio improvement
- Pricing dollars in excess of inflation dollars
- Capital Allocation:
 - Capital spending less than 15% of revenue
 - Capital plan of \$3.6 billion
 - Long term dividend payout target of ~45% of earnings
 - Excess cash to share repurchases

[a] The trailing twelve months income statement information ended March 31, 2023, is recalculated by taking the twelve months ended December 31, 2022, subtracting the three months ended March 31, 2022, and adding the three months ended March 31, 2023.

[b] Represents the hypothetical interest expense we would incur (using the incremental borrowing rate) if the property under our operating leases were owned or accounted for as finance leases.

* Total debt plus operating lease liabilities plus after-tax unfunded pension and OPEB (other postretirement benefit) obligations divided by net income plus income tax expense, depreciation, amortization, interest expense, and adjustments for other income and interest on operating lease liabilities. Adjusted debt to adjusted EBITDA (earnings before interest, taxes, depreciation, amortization, and adjustments for other income and interest on operating lease liabilities) is considered non-GAAP financial measure by SEC Regulation G and Item 10 of SEC Regulation S-K and may not be defined and calculated by other companies in the same manner. We believe this measure is important to management and investors in evaluating the Company's ability to sustain given debt levels (including leases) with the cash generated from operations. In addition, a comparable measure is used by rating agencies when reviewing the Company's credit rating. Adjusted debt to adjusted EBITDA should be considered in addition to, rather than as a substitute for, net income. The table above provide a reconciliation from net income to adjusted EBITDA and debt to adjusted debt. At March 31, 2023, and December 31, 2022, the incremental borrowing rate on operating lease liabilities was 3.4% and 3.3%, respectively.
