## SAFETY, SERVICE & OPERATIONAL EXCELLENCE = GROWTH

The Union Pacific team is focused on being the best in **Safety, Service and Operational Excellence**. It defines how we win and grow: Safely delivering the service we sold our customers, investing in our railroad, using our resources and assets efficiently, and proactively engaging with our teams and stakeholders.

## UNION PACIFIC IN OREGON

Union Pacific safely, reliably and efficiently transports a broad array of commodities and products important to Oregon and the national economy, including Hood River Valley pears, plant nursery products and Oregon lumber products vital to construction projects across the country.

Union Pacific works directly with some of the largest Christmas tree farms in Oregon – the top Christmas tree producing state in the U.S., according to the National Christmas Tree Association – to deliver rail car containers to farms in Oregon’s Willamette Valley and other parts of the state. The tree farms harvest the trees and immediately load them into specially prepared rail car containers that depart Union Pacific’s Brooklyn Yard facility near downtown Portland for travel to Union Pacific rail facilities in Lathrop, California, and downtown Los Angeles.

With more than 25 million Christmas trees sold in the U.S. every year, Union Pacific and Oregon play crucial roles spreading the spirit of the season to Americans in the western U.S.

From 2019-2023, Union Pacific invested \$430 million strengthening Oregon’s transportation infrastructure.

## HELPING COMMUNITIES THRIVE

Union Pacific proudly supports Oregon organizations through its [Community Ties Giving Program](#). In 2023, the company contributed more than \$459,000 to local groups, including the Oregon Zoo Foundation, Portland Community College Foundation and Arts Council of Pendleton. Grants were awarded to programs meeting one of Union Pacific's philanthropic objectives: helping communities prevent and prepare for accidents and emergencies; fostering skills development for family-supporting jobs; creating vibrant community spaces; and advancing the health of our environment.

Union Pacific's community focus is embedded in the company culture. In Oregon, this means fostering critical relationships with Native American Tribes in the Columbia River Gorge, as well as in the cities and towns where Union Pacific trains operate.

## DRIVING INNOVATION AND SUSTAINABILITY

Union Pacific's rails are technological runways enhanced with GPS, specialized sensors and, in some areas, Positive Train Control (PTC). PTC is an advanced system designed to automatically stop a train before certain incidents occur, such as train-to-train collisions and derailments caused by excessive speed or movement through misaligned track switches. PTC is installed on 100% of required Union Pacific rail lines; implementation efforts also ensured interoperability with other freight and passenger railroads operating on our tracks.

Unmanned Aerial Systems (UAS), or drones, are part of Union Pacific's safety toolkit, collecting valuable information at derailment sites and natural disaster incidents, allowing the company to assess its infrastructure and respond while keeping employees out of harm's way. Union Pacific is researching [autonomous drone infrastructure inspection technology](#), enabling the company to fly drones in places without GPS coverage, such as within or under a large metal bridge or into deep culverts.

Commuter train service operates on Union Pacific track throughout the state, providing a safe and efficient alternate mode of transportation that reduces emissions on congested Oregon highways. Recent Connect Oregon projects improved freight and passenger efficiency through Portland and all of Oregon.

Union Pacific's vision of building America involves protecting and strengthening the environment. One train can take several hundred trucks off Oregon's already congested highways. A Union Pacific train can move one ton of freight 454 miles on a single gallon of diesel, generating a carbon footprint that is 75% less than trucks.

## AMERICA'S PREMIER RAILROAD

One of America's most recognized companies, Union Pacific Railroad (NYSE: UNP) connects 23 states in the western two-thirds of the country by rail, providing a critical link in the global supply chain. From 2014-2023, Union Pacific invested approximately \$34 billion in its network and operations to support America's transportation infrastructure. The railroad's diversified business mix includes its Bulk, Industrial and Premium business groups. Union Pacific serves many of the fastest-growing U.S. population centers, operates from all major West Coast and Gulf Coast ports to eastern gateways, connects with Canada's rail systems and is the only railroad serving all six major Mexico gateways. Union Pacific provides value to its approximately 10,000 customers by delivering products in a safe, reliable, fuel-efficient and environmentally responsible manner.
