2. Petroleum Products	2. Industrial Chemicals
3. Wheat & Flour	3. Biofuels & Sweeteners
4. Brewers & Beverage	4. Petcoke
5. Lumber & Building Materials	5. Non-Metallic Minerals

* By volume

SUPPORTING MONTANA'S ECONOMY

Union Pacific's Montana freight operations handle an array of important commodities, including grain products, beer and beverages, automobiles, lumber and building materials. Union Pacific's network in the state extends from Lima to the Port of Montana at Butte, linking Montana industries to transcontinental routes and western ocean ports.

Union Pacific's operations in Montana play a significant role servicing the state's mining interests. Large quantities of raw materials are safely, reliably and efficiently transported to manufacturing sites within the state and across the country for development and economic purposes.

HELPING COMMUNITIES THRIVE

Union Pacific proudly supports Montana organizations through its [Community Ties Giving Program](#). In 2024, Union Pacific provided more than \$23,000 to local groups, such as Code Girls United, Beaverhead Trails Coalition and Mainstreet Uptown Butte. Grants were awarded to programs meeting one of Union Pacific's philanthropic objectives: helping communities prevent and prepare for incidents and emergencies; fostering skills development for family-supporting jobs; equipping community members with opportunities to live healthy, vital lives; and advancing the health of our environment.

INVESTING IN SAFETY

Rail is the safest way to move large quantities of freight over land. In fact, freight rail is 17 times safer than trucks per gross ton miles, according to data from the Federal Railroad Administration (FRA) and U.S. Department of Transportation.

Union Pacific continues to advance its commitment to safety through enhanced training, a strengthened safety culture, targeted infrastructure investments and the integration of cutting-edge technology.

From 2020-2024, Union Pacific invested more than \$11 million strengthening its Montana infrastructure. Annual projects include new ties and rail, as well as bridge maintenance.

Union Pacific special agents work in tandem with local law enforcement officers to enhance safety along rail corridors. In 2024, Union Pacific trained 6,000 first responders in communities across our network to support emergency preparedness and share best practices.

HARNESSING TECHNOLOGY

Union Pacific leverages cutting-edge technology to keep people, communities and freight safe. From real-time monitoring systems to predictive analytics, innovation is helping the railroad operate smarter and more sustainably.

As part of more than \$30 million in safety and security investments, Union Pacific uses drones to gather aerial data and help crews safely assess infrastructure.

Programs like Train Builder enable us to safely increase train length and deliver goods faster, while customer-facing platforms like UPGo and Fast Gate streamline intermodal terminal access. GPS tracking improves shipment visibility across the network, enhancing efficiency and service.

Foundational to these efforts is Positive Train Control (PTC), a GPS- and sensor-based system that monitors train speed and track conditions in real time. When a potential hazard is detected, PTC alerts the crew or automatically stops the train.

Working alongside PTC is the Energy Management System (EMS), installed on more than 3,500 locomotives. Acting like intelligent cruise control, EMS uses real-time data to improve train handling and optimize fuel consumption.

These technologies enhance safety while advancing sustainability. One train can move 1 ton of freight nearly 500 miles on a gallon of fuel, reducing greenhouse gas emissions by up to 75% compared to trucks.

CONNECTING THE NATION

One of America's most recognized companies, Union Pacific Railroad (NYSE: UNP) connects 23 states in the western two-thirds of the country by rail, providing a critical link in the global supply chain. From 2015-2024, Union Pacific invested approximately \$34 billion in its network and operations to support America's transportation infrastructure. The railroad's diversified business mix includes its Bulk, Industrial and Premium business groups. Union Pacific serves many of the fastest-growing U.S. population centers, operates from all major West Coast and Gulf Coast ports to eastern gateways, connects with Canada's rail systems and is the only railroad serving all six major Mexico gateways. Union Pacific provides value to its approximately 10,000 customers by delivering products in a safe, reliable and fuel-efficient manner.

UNLEASHING ECONOMIC INNOVATION

The [Association of American Railroads](#) estimates U.S. railroads contributed \$233.4 billion in total economic output in 2023, supporting business activity and nearly 750,000 jobs across the economy. Rail is not just a means of moving goods and people – it is a force multiplier for the U.S. economy. It sustains jobs, reduces business costs, fuels supply chains, facilitates trade, and delivers critical public benefits like lower emissions and reduced highway congestion. A strong rail industry is essential to keeping the U.S. competitive, resilient and vibrant – a pillar in America's economic success.
