

UNION PACIFIC IN OKLAHOMA

SAFETY, SERVICE & OPERATIONAL EXCELLENCE = GROWTH

The Union Pacific team is focused on being the best in **Safety, Service and Operational Excellence**. It defines how we win and grow: Safely delivering the service we sold our customers, investing in our railroad, using our resources and assets efficiently, and proactively engaging with our teams and stakeholders.

2024 FAST FACTS

Miles of Track	1,240
Annual Payroll	\$43.2 million
In-State Purchase	\$162.2 million
Capital Investment	\$44 million
Community Giving	\$88,000
Employees	242

RAIL CARS IN OKLAHOMA

Year	Originated	Terminated
2020	38,692	40,656
2021	37,571	56,188
2022	40,076	55,393
2023	40,316	55,450
2024	41,446	38,058

TOP FIVE COMMODITIES IN 2024*

Shipped	Received
1. Stone & Gravel	1. Stone & Gravel
2. Paperboard & Printing Paper	2. Coal
3. Fertilizer	3. Assembled Autos
4. Wheat & Flour	4. Feed Ingredients
5. Cement & Misc. Minerals	5. Plastics

* By volume

SUPPORTING OKLAHOMA'S ECONOMY

Oklahoma is a vital link in Union Pacific's north-south corridor between the Midwest and the Gulf Coast. Several Oklahoma industries enjoy the many benefits of freight rail. Union Pacific provides the state with a robust rail infrastructure helping drive the state economy.

In addition to safely, reliably and efficiently shipping coal and grain through the state, Union Pacific provides Oklahoma wheat, cement and aggregate producers a means to move their product outside the state. The drilling industry in western Oklahoma receives pipe and frac sand on Union Pacific trains.

Union Pacific invests private capital to maintain and improve its infrastructure in Oklahoma and across its network. From 2020-2024, Union Pacific spent \$177 million on Oklahoma tracks, structures and facilities. This commitment to providing a safe, reliable and efficient network makes Union Pacific a valuable resource in attracting new business and industry.

HELPING COMMUNITIES THRIVE

Union Pacific proudly supports Oklahoma organizations through its [Community Ties Giving Program](#). In 2024, Union Pacific contributed more than \$88,000 to Oklahoma organizations, including Oklahoma Operation Lifesaver, Neighbors Building Neighborhoods and Enid Community Theater. Grants were awarded to programs meeting one of Union Pacific's philanthropic objectives: helping communities prevent and prepare for incidents and emergencies; fostering skills development for family-supporting jobs; equipping community members with opportunities to live healthy, vital lives; and advancing the health of our environment.

INVESTING IN SAFETY

Rail is the safest way to move large quantities of freight over land. In fact, freight rail is 17 times safer than trucks per gross ton miles, according to data from the Federal Railroad Administration (FRA) and U.S. Department of Transportation.

Union Pacific continues to advance its commitment to safety through enhanced training, a strengthened safety culture, targeted infrastructure investments and the integration of cutting-edge technology.

Union Pacific special agents work in tandem with local law enforcement officers to enhance safety along rail corridors. In 2024, Union Pacific trained 6,000 first responders in communities across our network to support emergency preparedness and share best practices.

HARNESSING TECHNOLOGY

Union Pacific leverages cutting-edge technology to keep people, communities and freight safe. From real-time monitoring systems to predictive analytics, innovation is helping the railroad operate smarter and more sustainably.

As part of more than \$30 million in safety and security investments, Union Pacific uses drones to gather aerial data and help crews safely assess infrastructure.

Programs like Train Builder enable us to safely increase train length and deliver goods faster, while customer-facing platforms like UPGO and Fast Gate streamline intermodal terminal access. GPS tracking improves shipment visibility across the network, enhancing efficiency and service.

Foundational to these efforts is Positive Train Control (PTC), a GPS- and sensor-based system that monitors train speed and track conditions in real time. When a potential hazard is detected, PTC alerts the crew or automatically stops the train.

Working alongside PTC is the Energy Management System (EMS), installed on more than 3,500 locomotives. Acting like intelligent cruise control, EMS uses real-time data to improve train handling and optimize fuel consumption.

These technologies enhance safety while advancing sustainability. One train can move 1 ton of freight nearly 500 miles on a gallon of fuel, reducing greenhouse gas emissions by up to 75% compared to trucks.

CONNECTING THE NATION

One of America's most recognized companies, Union Pacific Railroad (NYSE: UNP) connects 23 states in the western two-thirds of the country by rail, providing a critical link in the global supply chain. From 2015-2024, Union Pacific invested approximately \$34 billion in its network and operations to support America's transportation infrastructure. The railroad's diversified business mix includes its Bulk, Industrial and Premium business groups. Union Pacific serves many of the fastest-growing U.S. population centers, operates from all major West Coast and Gulf Coast ports to eastern gateways, connects with Canada's rail systems and is the only railroad serving all six major Mexico gateways. Union Pacific provides value to its approximately 10,000 customers by delivering products in a safe, reliable and fuel-efficient manner.

UNLEASHING ECONOMIC INNOVATION

The [Association of American Railroads](#) estimates U.S. railroads contributed \$233.4 billion in total economic output in 2023, supporting business activity and nearly 750,000 jobs across the economy. Rail is not just a means of moving goods and people – it is a force multiplier for the U.S. economy. It sustains jobs, reduces business costs, fuels supply chains, facilitates trade, and delivers critical public benefits like lower emissions and reduced highway congestion. A strong rail industry is essential to keeping the U.S. competitive, resilient and vibrant – a pillar in America's economic success.
