## SAFETY, SERVICE & OPERATIONAL EXCELLENCE = GROWTH

The Union Pacific team is focused on being the best in **Safety, Service and Operational Excellence**. It defines how we win and grow: Safely delivering the service we sold our customers, investing in our railroad, using our resources and assets efficiently, and proactively engaging with our teams and stakeholders.

## SUPPORTING ARKANSAS' ECONOMY

Union Pacific operates some of its largest and most modern facilities within Arkansas, providing resources to businesses and industries seeking growth opportunities.

Union Pacific's second-largest freight car classification yard is in North Little Rock, where rail cars are sorted and trains built for departure. Various commodities move through the yard, with service directly supporting the Little Rock Port. Additional yard locations across the state and a \$70 million state-of-the-art, 600-acre intermodal facility at Marion help Union Pacific provide safe, reliable and efficient customer service.

From 2019-2023, Union Pacific spent more than \$819 million on Arkansas tracks, structures and facilities. This commitment to providing a safe, reliable and efficient network allows Union Pacific to be a valuable resource in attracting new business and industry.

## HELPING COMMUNITIES THRIVE

Union Pacific proudly supports Arkansas organizations through its [Community Ties Giving Program](#). In 2023, the company provided more than \$274,000 to local organizations, including Associated Industries of Arkansas Foundation, Operation Lifesaver, and Arkansas Game and Fish Foundation. Grants were awarded to programs meeting one of Union Pacific's philanthropic objectives: helping communities prevent and prepare for accidents and emergencies; fostering skills development for family-supporting jobs; creating vibrant community spaces; and advancing the health of our environment.

## DRIVING INNOVATION AND SUSTAINABILITY

Union Pacific's rails are technological runways enhanced with GPS, specialized sensors and, in some areas, Positive Train Control (PTC). PTC is an advanced system designed to automatically stop a train before certain incidents occur, such as train-to-train collisions and derailments caused by excessive speed or movement through misaligned track switches. PTC is installed on 100% of required Union Pacific rail lines; implementation efforts also ensured interoperability with other freight and passenger railroads operating on our tracks.

North Little Rock is home to the Downing B. Jenks locomotive repair shop – UP's largest and most modern. It employs skilled workers from a variety of crafts performing heavy maintenance on more than 7,000 locomotives. This facility has played a critical role in equipping Union Pacific's fleet with the technology necessary to utilize PTC.

Union Pacific is using technology to drive fuel efficiency. One train can take several hundred trucks off Arkansas' already congested highways. A Union Pacific train can move one ton of freight 454 miles on a single gallon of diesel, generating a carbon footprint that is 75% less than trucks.

## AMERICA'S PREMIER RAILROAD

One of America's most recognized companies, Union Pacific Railroad (NYSE: UNP) connects 23 states in the western two-thirds of the country by rail, providing a critical link in the global supply chain. From 2014-2023, Union Pacific invested approximately \$34 billion in its network and operations to support America's transportation infrastructure. The railroad's diversified business mix includes its Bulk, Industrial and Premium business groups. Union Pacific serves many of the fastest-growing U.S. population centers, operates from all major West Coast and

Gulf Coast ports to eastern gateways, connects with Canada's rail systems and is the only railroad serving all six major Mexico gateways. Union Pacific provides value to its approximately 10,000 customers by delivering products in a safe, reliable, fuel-efficient and environmentally responsible manner.
