UNION PACIFIC IN IDAHO

Union Pacific's community focus is embedded in the company culture. In Idaho, this means fostering critical relationships with the cities and towns where Union Pacific trains operate.

In northern Idaho, Union Pacific's rail line connects Spokane, Washington, to the Canadian rail system via Eastport in Boundary County.

Southern Idaho is home to Union Pacific's main artery to the Pacific Northwest. Heavy amounts of transcontinental traffic travel the track following the Snake River. The area is laced with a network of railroad feeder lines serving Idaho's richly varied agricultural industry. Potatoes, sugar beets, beans, grain, fertilizer, phosphate and forest products are all moved by rail.

Pocatello and Nampa are home to important terminals for Union Pacific, serving as a hub for branch line activities and crew change points.

UNION PACIFIC IN IDAHO

Union Pacific proudly supports Idaho nonprofit organizations through its Community Ties Giving Program. In 2020, Union Pacific donated more than \$268,000 to Idaho charitable organizations, such as the Leap Charities, Montpelier Community Foundation and Giving Cupboard. Grants are awarded to programs meeting one of Union Pacific's philanthropic objectives: helping communities prevent and prepare for accidents and emergencies; fostering skills development for family-supporting jobs; and creating vibrant community spaces.

INVESTING IN SAFETY

The safety of Union Pacific's employees, customers and the communities it operates in is the company's No. 1 priority. From 2016-2020, Union Pacific invested more than \$236 million strengthening its Idaho infrastructure. Annual projects include new ties and rail, as well as bridge maintenance.

Union Pacific special agents work in tandem with local law enforcement officers to enhance rail safety. The goal is decreasing crossing accidents and, ultimately, eliminating them.

DRIVING INNOVATION AND SUSTAINABILITY

Union Pacific's rails are technological runways enhanced with GPS, specialized sensors and, in some areas, Positive Train Control (PTC). PTC is an advanced system designed to automatically stop a train before certain incidents occur, such as train-to-train collisions and derailments caused by excessive speed or movement through misaligned track switches. PTC is installed on 100% of required Union Pacific rail lines; implementation efforts also ensured interoperability with other freight and passenger railroads operating on our tracks.

Unmanned Aerial Systems (UAS), or drones, are part of Union Pacific's safety tool kit, collecting valuable information at derailment sites and natural disaster incidents, allowing the company to assess its infrastructure and respond while keeping employees out of harm's way. Union Pacific is pioneering autonomous drone infrastructure inspection technology, enabling the company to fly drones in places without GPS coverage, such as within or under a large metal bridge or into deep culverts.

The company also is using technology to drive fuel efficiency. One train can take several hundred trucks off Idaho's highways. Union Pacific trains can move a ton of freight 454 miles on a single gallon of diesel fuel,

generating a carbon footprint that is 75 percent less than trucks.

AMERICA'S PREMIER RAILROAD

Union Pacific Railroad is the principal operating company of Union Pacific Corporation (NYSE: UNP). One of America's most recognized companies, Union Pacific Railroad connects 23 states in the western two-thirds of the country by rail, providing a critical link in the global supply chain. From 2011-2020, Union Pacific invested approximately \$35 billion in its network and operations to support America's transportation infrastructure. The railroad's diversified business mix includes its Bulk, Industrial and Premium business groups. Union Pacific serves many of the fastest-growing U.S. population centers, operates from all major West Coast and Gulf Coast ports to eastern gateways, connects with Canada's rail systems and is the only railroad serving all six major Mexico gateways. Union Pacific provides value to its roughly 10,000 customers by delivering products in a safe, reliable, fuel-efficient and environmentally responsible manner.
