UNION PACIFIC: DRIVING KANSAS GROWTH

With a long, storied railroad history and 2,199 miles of Union Pacific track in active service, Kansas is a nucleus for rail transportation in America. Customers from a variety of industries enjoy the benefits of freight rail, and Union Pacific is continuously looking for opportunities to help businesses grow.

A Kansas rail map shows the important position the state holds in Union Pacific's overall network. In the northeast, a piece of a transcontinental corridor passes through Topeka and Kansas City and can see as many as 60 trains per day. Running north-south through Kansas City are important rail lines connecting the Midwest with the Gulf of Mexico ports in Texas and Louisiana.

As the rail lines extend throughout the state, Union Pacific serves a variety of customers by bringing in raw materials and supplies and exporting goods. Grain is a primary commodity as Kansas farmers move their crops to market. Coal trains are also a frequent sight, as they are necessary to fuel power plants in the state. Union Pacific proudly

UNION PACIFIC IN KANSAS

serves the logistical and transport needs of the U.S. Army at Fort Riley.

Union Pacific invests private capital to maintain and improve its extensive infrastructure in Kansas, including \$536 million from 2017-2021.

INNOVATIVE SOLUTIONS

Union Pacific's rails are technological runways enhanced with GPS, specialized sensors and, in some areas, Positive Train Control (PTC). PTC is an advanced system designed to automatically stop a train before certain incidents occur, such as train-to-train collisions and derailments caused by excessive speed or movement through misaligned track switches. PTC is installed on 100% of required Union Pacific rail lines; implementation efforts also ensured interoperability with other freight and passenger railroads operating on our tracks.

Serving Kansas is a network of light-density, grain-gathering branch lines. Union Pacific partners with local short-line railroads, as they have leased or purchased these lines. This program is a solution developed to utilize existing infrastructure and maintain valuable rural rail service. Farmers and producers across the state continue to have cost-effective access to long-distance markets.

SERVING MORE THAN JUST CUSTOMERS

The benefits of Union Pacific's world-class franchise extend beyond its customers. One train can take several hundred trucks off already congested highways. A Union Pacific train can move one ton of freight 463 miles on a single gallon of diesel, generating a carbon footprint that is 75% less than trucks.

Union Pacific proudly supports Kansas nonprofit organizations through its Community Ties Giving Program. In 2021, Union Pacific donated more than \$270,000 to Kansas local organizations, such as Kansas Operation Lifesaver, Wichita Women's Initiative Network and Topeka Performing Arts Center. Grants are awarded to programs meeting one of Union Pacific's philanthropic objectives: helping communities prevent and prepare for accidents and emergencies; fostering skills development for family-supporting jobs; and creating vibrant community spaces.

AMERICA'S PREMIER RAILROAD

One of America's most recognized companies, Union Pacific Railroad (NYSE: UNP) connects 23 states in the western two-thirds of the country by rail, providing a critical link in the global supply chain. From 2012-2021, Union Pacific invested approximately \$35 billion in its network and operations to support America's transportation infrastructure. The railroad's diversified business mix includes its Bulk, Industrial and Premium business groups. Union Pacific serves many of the fastest-growing U.S. population centers, operates from all major West Coast and Gulf Coast ports to eastern gateways, connects with Canada's rail systems and is the only railroad serving all six major Mexico gateways. Union Pacific provides value to its roughly 10,000 customers by delivering products in a safe, reliable, fuel-efficient and environmentally responsible manner.
