UNION PACIFIC: DRIVING MISSOURI GROWTH

Missouri is home to 1,541 miles of Union Pacific track and two of its largest rail centers, Kansas City and St. Louis. More than 1,300 employees work safely and efficiently to deliver more than 200,000 rail cars per year to customers across the state.

Union Pacific has major freight operations in the Kansas City region, with half a dozen rail lines converging from all four directions. Critical east-west and north-south corridors meet in St. Louis, establishing significant connections between Chicago, the Gulf of Mexico ports in Texas and Louisiana, and the western states. Additionally, Union Pacific maintains a major freight car repair facility in De Soto.

From 2017-2021, private capital investment in Missouri's rail infrastructure exceeded \$381 million. This commitment to providing a safe and efficient network allows Union Pacific to be a valuable resource in attracting new business and industry.

UNION PACIFIC IN MISSOURI

INNOVATIVE SOLUTIONS

Union Pacific's rails are technological runways enhanced with GPS, specialized sensors and, in some areas, Positive Train Control (PTC). PTC is an advanced system designed to automatically stop a train before certain incidents occur, such as train-to-train collisions and derailments caused by excessive speed or movement through misaligned track switches. PTC is installed on 100% of required Union Pacific rail lines; implementation efforts also ensured interoperability with other freight and passenger railroads operating on our tracks.

Unmanned Aerial Systems (UAS), or drones, are part of Union Pacific's safety tool kit, collecting valuable information at derailment sites and natural disaster incidents, allowing the company to assess its infrastructure and respond while keeping employees out of harm's way. Union Pacific is pioneering autonomous drone infrastructure inspection technology, enabling the company to fly drones in places without GPS coverage, such as within or under a large metal bridge or into deep culverts.

SERVING MORE THAN JUST CUSTOMERS

The benefits of Union Pacific's world-class franchise extend beyond its customers. One train can take several hundred trucks off already congested highways. A Union Pacific train can move one ton of freight 463 miles on a single gallon of diesel, generating a carbon footprint that is 75% less than trucks.

Union Pacific proudly supports Missouri nonprofit organizations through its Community Ties Giving Program. In 2021, Union Pacific donated \$342,700 to Missouri local organizations, including Agriculture Future of America Inc., Women's Employment Network and the Boys and Girls Clubs of Greater Kansas City. Grants are awarded to programs meeting one of Union Pacific's philanthropic objectives: helping communities prevent and prepare for accidents and emergencies; fostering skills development for family-supporting jobs; and creating vibrant community spaces.

AMERICA'S PREMIER RAILROAD

One of America's most recognized companies, Union Pacific Railroad (NYSE: UNP) connects 23 states in the western two-thirds of the country by rail, providing a critical link in the global supply chain. From 2012-2021, Union Pacific invested approximately \$35 billion in its network and operations to support America's transportation infrastructure. The railroad's diversified business mix includes its Bulk, Industrial and Premium business groups. Union Pacific serves many of the fastest-growing U.S. population centers, operates from all major West Coast and Gulf Coast ports to eastern gateways, connects with Canada's rail systems and is the only railroad serving all six major Mexico gateways. Union Pacific provides value to its roughly 10,000 customers by delivering products in a safe, reliable, fuel-efficient and environmentally responsible manner.
