SUPPORTING MONTANA'S ECONOMY

Union Pacific's operations in Montana play a significant role servicing the state's mining interests. Large quantities of raw materials are transported to manufacturing sites within the state and across the country for development and economic purposes.

Union Pacific's Montana freight operations handle an array of important commodities, including grain products, beer and beverages, automobiles, lumber and building materials. Union Pacific's network in the state extends from Lima to the Port of Montana at Butte, linking Montana industries to transcontinental routes and western ocean ports.

Union Pacific proudly supports Montana nonprofit organizations through its Community Ties Giving Program. In 2020, the company provided more than \$32,000 to charitable groups, such as the V Foundation, Mainstreet Uptown Butte and University of Montana Foundation. Grants are awarded to programs meeting one of Union

UNION PACIFIC IN MONTANA

Pacific's philanthropic objectives: helping communities prevent and prepare for accidents and emergencies; fostering skills development for family-supporting jobs; and creating vibrant community spaces.

INVESTING IN SAFETY

The safety of Union Pacific's employees, customers and the communities it operates in is the company's No. 1 priority. From 2016-2020, Union Pacific invested more than \$8.2 million strengthening its Montana infrastructure. Annual projects include new ties and rail, as well as bridge maintenance.

Union Pacific annually hosts UP CARES operations targeting risky driver and pedestrian behavior around railroad tracks. Union Pacific special agents work in tandem with local law enforcement officers to enhance rail safety. The goal is decreasing crossing accidents, and, ultimately, eliminating them.

DRIVING INNOVATION AND SUSTAINABILITY

Union Pacific's rails are technological runways enhanced with GPS, specialized sensors and, in some areas, Positive Train Control (PTC). PTC is an advanced system designed to automatically stop a train before certain incidents occur, such as train-to-train collisions and derailments caused by excessive speed or movement through misaligned track switches. PTC is installed on 100% of required Union Pacific rail lines; implementation efforts also ensured interoperability with other freight and passenger railroads operating on our tracks.

Unmanned Aerial Systems (UAS), or drones, are part of Union Pacific's safety tool kit, collecting valuable information at derailment sites and natural disaster incidents, allowing the company to assess its infrastructure and respond while keeping employees out of harm's way. Union Pacific is pioneering autonomous drone infrastructure inspection technology, enabling the company to fly drones in places without GPS coverage, such as within or under a large metal bridge or into deep culverts.

The company is also using technology to drive fuel efficiency. Union Pacific trains can move a ton of freight 454 miles on a single gallon of diesel fuel, generating a carbon footprint that is 75% less than trucks.

AMERICA'S PREMIER RAILROAD

Union Pacific Railroad is the principal operating company of Union Pacific Corporation (NYSE: UNP). One of America's most recognized companies, Union Pacific Railroad connects 23 states in the western two-thirds of the country by rail, providing a critical link in the global supply chain. From 2011-2020, Union Pacific invested approximately \$35 billion in its network and operations to support America's transportation infrastructure. The railroad's diversified business mix includes its Bulk, Industrial and Premium business groups. Union Pacific serves many of the fastest-growing U.S. population centers, operates from all major West Coast and Gulf Coast ports to eastern gateways, connects with Canada's rail systems and is the only railroad serving all six major Mexico gateways. Union Pacific provides value to its roughly 10,000 customers by delivering products in a safe, reliable, fuel-efficient and environmentally responsible manner.
