## UNION PACIFIC IN NEVADA

Union Pacific's operations in Nevada are split between two main lines that run across the state. One main line spans Northern Nevada, linking central California with Salt Lake City. The second runs through the southern part of the state, including Las Vegas. That line connects Los Angeles-Long Beach with Salt Lake City and Union Pacific's transcontinental line to eastern destinations.

In Northern Nevada, opportunities in the growing warehouse industry are made possible by the state's freepoint laws. In Southern Nevada, Union Pacific operations are a link to markets for the industrial complex in Henderson, near Las Vegas.

Union Pacific freight operations in Nevada handle an array of important commodities, including coal, chemicals, aggregates, lumber and consumer goods.

From 2017-2021, Union Pacific invested \$240 million strengthening Nevada's transportation infrastructure.

# UNION PACIFIC IN NEVADA

Union Pacific proudly supports Nevada nonprofit organizations through its Community Ties Giving Program. In 2021, the company provided more than \$104,000 to local groups, including the Las Vegas Young Artists Orchestra, Refuge For Women and the Food Bank of Northern Nevada. Grants are awarded to programs meeting one of Union Pacific's philanthropic objectives: helping communities prevent and prepare for accidents and emergencies; fostering skills development for family-supporting jobs; and creating vibrant community spaces.

## DRIVING INNOVATION AND SUSTAINABILITY

Union Pacific's rails are technological runways enhanced with GPS, specialized sensors and, in some areas, Positive Train Control (PTC). PTC is an advanced system designed to automatically stop a train before certain incidents occur, such as train-to-train collisions and derailments caused by excessive speed or movement through misaligned track switches. PTC is installed on 100% of required Union Pacific rail lines; implementation efforts also ensured interoperability with other freight and passenger railroads operating on our tracks.

Unmanned Aerial Systems (UAS), or drones, are part of Union Pacific's safety tool kit, collecting valuable information at derailment sites and natural disaster incidents, allowing the company to assess its infrastructure and respond while keeping employees out of harm's way. Union Pacific is pioneering autonomous drone infrastructure inspection technology, enabling the company to fly drones in places without GPS coverage, such as within or under a large metal bridge or into deep culverts.

Union Pacific's vision of building America involves protecting and strengthening the environment. Several initiatives and innovative technologies are helping achieve our environmental goals throughout the state.

New locomotives that meet the EPA's stringent Tier 4 emissions standards have been added to UP's fleet over the last few years, reducing particulate emissions by as much as 90% during operations. The new locomotives dramatically impact fuel efficiency and have helped progress our environmental efforts in Nevada.

One train can take several hundred trucks off Nevada's already congested highways. A Union Pacific train can move one ton of freight 463 miles on a single gallon of diesel, generating a carbon footprint that is 75% less than trucks.

## AMERICA'S PREMIER RAILROAD

Union Pacific Railroad is the principal operating company of Union Pacific Corporation (NYSE: UNP). One of America's most recognized companies, Union Pacific Railroad connects 23 states in the western two-thirds of the country by rail, providing a critical link in the global supply chain. From 2012-2021, Union Pacific invested approximately \$35 billion in its network and operations to support America's transportation infrastructure. The railroad's diversified business mix includes its Bulk, Industrial and Premium business groups. Union Pacific serves many of the fastest-growing U.S. population centers, operates from all major West Coast and Gulf Coast ports to eastern gateways, connects with Canada's rail systems and is the only railroad serving all six major Mexico gateways. Union Pacific provides value to its roughly 10,000 customers by delivering products in a safe, reliable, fuel-efficient and environmentally responsible manner.
